

installments which follows Form RD 440-22 as closely as possible. The full amount of the loan must show on the face of the instrument, and there must be provisions for entering the date and amount of each advance on the reverse or an attachment. When principal payments are deferred, the instrument will show that "interest only" is due on interest-only installment dates, rather than specific dollar amounts. The payment period including the "interest only" installment cannot exceed 40 years, the useful life of the facility, or State statute limitations, whichever occurs first. The amortized installment, computed as follows, will be shown as due on installment dates thereafter.

(1) *Monthly payments.* Multiply by twelve the number of years between the due date of the last interest-only installment and the final installment to determine the number of monthly payments. When there are no interest-only installments, multiply by twelve the number of years over which the loan is amortized. Then multiply the loan amount by the amortization factor and round to the next higher dollar.

(2) *Semiannual payments.* Multiply by two the number of years between the due date of the last interest-only installment and the due date of the final installment to determine the correct number of semiannual periods. When there are no interest-only installments, multiply by two the number of years over which the loan is amortized. Then multiply the loan amount by the applicable amortization factor.

(3) *Annual payments.* Subtract the due date of the last interest-only installment from the due date of the final installment to determine the number of annual payments. When there are no interest-only installments, the number of annual payments will equal the number of years over which the loan is amortized. Then multiply the loan amount by the applicable amortization factor and round to the next higher dollar.

(c) *Third preference—single instruments with installments of principal plus interest.* If a single instrument with amortized installments is not legally permissible, use a single instrument providing for installments of principal

plus interest accrued on the principal balance. For bonds with semiannual interest and annual principal, the interest is calculated by multiplying the principal balance times the interest rate and dividing this figure by two. Principal installments are to be scheduled so that total combined interest and principal payments closely approximate amortized payments.

(1) The repayment terms concerning interest only installments described in paragraph (b) of this section apply.

(2) The instrument shall contain in substance provisions indicating:

(i) Principal maturities and due dates;

(ii) Regular payments shall be applied first to interest due through the next principal and interest installment due date and then to principal due in chronological order stipulated in the bond; and

(iii) Payments on delinquent accounts will be applied in the following sequence:

(A) Billed delinquent interest;

(B) Past due interest installments;

(C) Past due principal installments;

(D) Interest installment due; and

(E) Principal installment due.

(d) *Fourth preference—serial bonds with installments of principal plus interest.* If instruments described under the first, second, and third preferences are not legally permissible, use serial bonds with a bond or bonds delivered in the amount of each advance. Bonds will be numbered consecutively and delivered in chronological order. Such bonds will conform to the minimum requirements of § 1780.94. Provisions for application of payments will be the same as those set forth in paragraph (c)(2)(ii) of this section.

(e) *Coupon bonds.* Coupon bonds will not be used unless required by State statute. Such bonds will conform to the minimum requirements of § 1780.94.

§ 1780.88 [Reserved]

§ 1780.89 Multiple advances of Agency funds using permanent instruments.

Where interim financing from commercial sources is not used, Agency loan proceeds will be disbursed on an "as needed by borrower" basis in

amounts not to exceed the amount needed during 30-day periods.

§ 1780.90 Multiple advances of Agency funds using temporary debt instruments.

When none of the instruments described in § 1780.87 are legally permissible or practical, a bond anticipation note or similar temporary debt instrument may be used. The debt instrument will provide for multiple advances of Agency funds and will be for the full amount of the Agency loan. The instrument will be prepared by bond counsel, or local counsel if bond counsel is not involved, and approved by the State program official and OGC. At the same time the Agency delivers the last advance, the borrower will deliver the permanent bond instrument and the canceled temporary instrument will be returned to the borrower. The approved debt instrument will show at least the following:

- (a) The date from which each advance will bear interest;
- (b) The interest rate as determined by § 1780.13;
- (c) A payment schedule providing for interest on outstanding principal at least annually; and
- (d) A maturity date which shall be no earlier than the anticipated issuance date of the permanent instruments and no longer than the 40-year statutory limit.

§§ 1780.91–1780.93 [Reserved]

§ 1780.94 Minimum bond specifications.

The provisions of this section are minimum specifications only and must be followed to the extent legally permissible.

(a) *Type and denominations.* Bond resolutions or ordinances will provide that the instruments be either a bond representing the total amount of the indebtedness or serial bonds in denominations customarily accepted in municipal financing (ordinarily in multiples of not less than \$1,000). Single bonds may provide for repayment of principal plus interest or amortized installments. Amortized installments are preferred by the Agency.

(b) *Bond registration.* Bonds will contain provisions permitting registration

for both principal and interest. Bonds purchased by the Agency will be registered in the name of “United States of America” and will remain so registered at all times while the bonds are held or insured by the Government. The Agency address for registration purposes will be that of the Finance Office.

(c) *Size and quality.* Size of bonds and coupons should conform to standard practice. Paper must be of sufficient quality to prevent deterioration through ordinary handling over the life of the loan.

(d) *Date of bond.* Bonds will normally be dated as of the day of delivery. However, the borrower may use another date if approved by the Agency. Loan closing is the date of delivery of the bonds or the date of delivery of the first bond when utilizing serial bonds, regardless of the date of delivery of the funds. The date of delivery will be stated in the bond if different from the date of the bond. In all cases, interest will accrue from the date of delivery of the funds.

(e) *Payment date.* Loan payments will be scheduled to coincide with income availability and be in accordance with State law.

(1) If income is available monthly, monthly payments are recommended unless precluded by State law. If income is available quarterly or otherwise more frequently than annually, payments must be scheduled on such basis. However, if State law only permits principal plus interest (P&I) type bonds, annual or semiannual payments will be used.

(2) The payment schedule will be enumerated in the evidence of debt, or if that is not feasible, in a supplemental agreement.

(3) If feasible, the first payment will be scheduled one full month, or other period, as appropriate, from the date of loan closing or any deferment period. Due dates falling on the 29th, 30th, and 31st day of the month will be avoided. When principal payments are deferred, interest-only payments will be scheduled at least annually.

(f) *Extra payments.* Extra payments are derived from the sale of basic chattel or real estate security, refund of unused loan funds, cash proceeds of
